

To Our Valued Client,

The following Table of Contents outlines our comprehensive commentary,
“Senegal’s Rise as a West African Energy Hub.”

Your access includes a **complimentary 30-minute session** with an EnergyStrat analyst. To make the most of this discussion, we encourage you to email your specific questions or requirements in advance to support@energystrat.consulting.

Please feel free to use this time to discuss your exact needs if the commentary does not fully meet them.

Thank you, and we look forward to supporting your strategic objectives.

Sincerely,

The EnergyStrat Consulting Team

What is New Frontier Series Type Commentary section?

Definition

The "**New Frontier Series**" commentary is a specific intelligence product by *EnergyStrat Consulting* that focuses on providing **decisive, strategic guidance** for making **capital-intensive decisions** within emerging high-risk (frontier) markets.

Purpose

The commentary's core purpose is to **de-risk market entry** by modeling scenarios, quantifying market opportunities (e.g., the US\$8.5 - 11.5 billion EPC market), and delivering an **actionable, risk-adjusted roadmap** for clients. It moves beyond simple forecasting to offer specialized, scenario-based analysis for navigating complex political, fiscal, and regulatory challenges (like local content rules) that define new frontiers.

Likely Beneficiaries

The primary recipients of this specialized intelligence are organizations facing high-stakes decisions in new energy markets:

Engineering, Procurement, and Construction (EPC) Contractors and OEMs: To secure a share of the quantified multi-billion dollar project pipeline by understanding FID and tender timelines, and mitigating execution risks.

Institutional Investors, Banks, and Project Financiers (CXOs): To structure financing, price risk, and underwrite insurance by leveraging the scenario modeling and deep analysis of the host country's fiscal and political regime.

International Oil and Gas Companies (IOCs): To gain competitive and regulatory intelligence, assess execution risks faced by their contractors, and strategically manage relationships with the host government and national oil company (PETROSEN).

Detailed Table of Contents

The following is a detailed Table of Contents based on the structure of the provided report.

Title: Senegal's Rise as a West African Energy Hub: Opportunities, Risks, and EPC Market Outlook 2025-2030

Date: September 2025

Section	Title	Page No.
	Commentary / Cover	1
	About Us (EnergyStrat Consulting)	2
	Strategic Imperative	3
	Key Takeaways	3
	Executive Summary	4
1.	Country Overview & Strategic Significance	6
	Major Fields & Operators	6
	Production Trajectory	7
2.	EPC and FID Timeline	8
	Upcoming FID & EPC Timelines (Forward Outlook)	8-9
	Key Insights: (Yakaar-Teranga, GTA Phase 2, Sangomar Phase 2)	9
3.	Senegal in Regional Context	10

Section	Title	Page No.
4.	Fiscal Regime (Senegal Petroleum Code & PSC Practice)	11
	Element/Regime/Why it matters for financiers / CXOs (multiple tables)	11-13
5.	Risks and Challenges	14
	Risk Category Table (Political, Regulatory, Execution, Community, etc.)	14
